Clients Say

My learning experience for Java Developer at Code College was very practical – almost like being on the job, which is a great way to learn programming and understanding all the technologies you will need. I was surrounded by positive like-minded people at Code College, all trying to head in the same direction. I had to make time on Sundays and weekday evenings for the assignments. I have really learned a lot in the 6 months now that I look back. Our facilitator, Arnold, guided

us every step of the way – even after the Java...

I have really learned a lot from him. He is very helpful and explain the work very well. I am very satisfied with the way he teached us. He is...

Anne

[Junior Python Developer](#)

I especially enjoyed the Java web application project because of the exposure to web technologies. My employer produces a Java web application that offers vehicle tracking and management and accepted me on the strength of his knowledge in this area, obtained via the Java...

It doesn't get any better than this. Here is my story. I come from a call centre environment and I was really tired of it, so I wanted to do programming on a full-time basis...

Xolani

[Java Developer](#)

As a trainer myself – I am satisfied with the level of professionalism that Code College has given us, will consider utilising them should the next opportunity arise, and therefore can readily recommend them to anyone else that contemplates utilising their...
