COURSE CURRICULUM

What You'll Learn

Angular CLI & Project Setup

Scaffold a new Angular project, understand the folder structure and run the development server.

Components & Templates

Create reusable components, use template syntax, property binding and event binding.

Services & Dependency Injection

Organise business logic into injectable services and understand Angular's DI system.

Forms — Template-Driven & Reactive

Build and validate both template-driven and reactive forms.

State Management Basics

Component communication, BehaviorSubject and an introduction to NgRx concepts.

TypeScript Fundamentals

Types, interfaces, decorators and classes — the building blocks of Angular development.

Directives & Pipes

Built-in and custom structural/attribute directives. Built-in pipes and creating your own.

Routing & Navigation

Lazy-loaded routes, route guards, child routes and passing parameters.

HTTP Client & RxJS

Consume REST APIs with HttpClient, handle errors and work with Observables and operators.

Building & Deploying

Production builds, environment files and deploying to a live server.

WHAT TO EXPECT

Your Learning Experience

Expert-Led Training

Taught by experienced bootcamp instructors with 30+ years of combined industry experience.

Hands-On Projects

You write code from day one. Every concept is reinforced with real exercises and a practical project you keep.

Johannesburg & Cape Town

Attend in-person at our Woodmead (JHB) or Cape Town campus, or join 100% online from anywhere.

Certificate of Completion

Receive a Code College certificate on completion — recognised by employers across South Africa.
