COURSE CURRICULUM

What You'll Learn

Laravel Installation & Project Structure

Composer, artisan CLI, understanding the MVC folder structure and routing.

Routing & Controllers

Route types, controller actions, resource controllers and middleware.

Blade Templating Engine

Layouts, sections, components, directives and passing data to views.

Eloquent ORM

Models, migrations, relationships (hasMany, belongsTo, manyToMany), query builder.

Database Migrations & Seeders

Schema builder, running migrations, seeding test data with Faker.

Authentication & Authorisation

Laravel Breeze/Fortify, gates, policies and role-based access.

Form Validation & Requests

Form Request classes, validation rules, error messages.

File Storage

Local and cloud (S3) file storage with the Storage facade.

RESTful API Development

API routes, JSON resources, API authentication with Sanctum.

Testing & Deployment

Feature tests with PHPUnit, deploying to shared hosting or a VPS.
