

Short Courses That Stack Into a Career

Six Stand-Alone Modules · Take One, a Track, or All Six

Six stand-alone cybersecurity short courses, each covering a real job role — from networking foundations to ethical hacking, SOC analyst training and cloud security. Study part-time online or in-person in Johannesburg. Take one module, take a track, or complete all six for the full Cybersecurity Bootcamp Certificate. CompTIA Security+, CEH, CySA+ aligned.

SIX MODULES · ONE COMPLETE CAREER

Pick Your Module

1

IT & Networking Foundations

🔗 ISC² CC · CompTIA Network+

Start from zero — master the OSI model, TCP/IP, DNS, routing, and Wireshark analysis. Set up your Kali Linux lab. Required entry point for all tracks.

R9,500

80 hrs · 4 wks FT

2

Core Security Fundamentals

🔗 CompTIA Security+ (SY0-701)

Attacks, cryptography, PKI, firewalls, IDS/IPS, vulnerability scanning and POPIA/NIST compliance. Prepares you for the world's most in-demand security cert.

R10,500

80 hrs · 4 wks FT

3

Ethical Hacking & Pen Testing

🔗 EC-Council CEH v13

Think like an attacker — Kali Linux, Metasploit, Burp Suite, OWASP Top 10, wireless attacks, and professional pen test report writing. CEH v13 exam-ready.

R12,000

100 hrs · 5 wks FT

4

Blue Team & SOC Operations

🔗 CompTIA CySA+ (CS0-003)

Deploy Security Onion, hunt threats with Zeek + Suricata, do incident response with Volatility, and build Splunk dashboards. CySA+ exam-ready.

R12,000

100 hrs · 5 wks FT

5

Specialisation & Cloud Security

🔗 CompTIA PenTest+ / Cloud+ · AWS & Azure Security

Secure AWS and Azure environments, apply DevSecOps practices (Docker, CI/CD, secrets management), and choose your elective: PenTest+ or Cloud+.

R10,500

80 hrs · 4 wks FT

6

Portfolio & Job Readiness

🔗 Full Bootcamp Certificate (all 6 modules)

Build your capstone project, publish your GitHub portfolio, polish your CV and LinkedIn, and do mock technical interviews. Career launch included.

R8,500

80 hrs · 4 wks FT

LOW-RISK START

Try Before You Buy a Bootcamp

1

Try Module 1

R9,500 · 4 weeks. No experience required.

2

Decide Within 3 Months

No pressure — think it over.

3

Credit Applied

R9,500 off your track or bootcamp.

HOW STACKING WORKS

One Module at a Time, or All Six

Every module is a complete, stand-alone short course with its own international certification alignment. Module 1 is the entry point for every path. Complete any three modules as a Specialist Track, or all six within a 24-month window to earn the full Code College Cybersecurity Bootcamp Certificate — even if the modules were taken as separate enrolments over time.

FAQS

Frequently Asked Questions

Q Do I need any IT experience to start Module 1?

No prior experience is required for Module 1 — IT & Networking Foundations. It is designed for absolute beginners and covers everything from the OSI model upwards. If you know what a router does, you are ready. You do not need programming knowledge to start.

Q Can I take modules in any order?

Module 1 is the entry point for all paths. Module 2 requires Module 1 (or a placement assessment). Modules 3, 4 and 5 require Module 2. Module 6 requires completion of at least Module 4 or 5. If you hold relevant industry certifications (CompTIA Security+, CEH etc.), you may apply for Recognition of Prior Learning (RPL) and skip the corresponding module — a R500 placement test applies.

Q Do the modules include the certification exam?

Each module fully prepares you for the corresponding certification exam. Individual module prices do not include the exam voucher — students purchase their own vouchers directly from CompTIA, EC-Council, or ISC². The Professional and Elite bootcamp tiers include exam vouchers for Security+ and (Elite tier) CySA+ as part of the package. Exam vouchers can also be purchased separately through Code College once CompTIA ATP status is obtained.

Q What is the 24-month stacking window?

Students who complete all six modules within any 24-month period automatically receive the full Code College Cybersecurity Bootcamp Certificate — even if the modules were taken as separate enrolments over time. This allows part-time learners to build the qualification at their own pace without losing credit for prior modules.

Q What hardware do I need?

Minimum: Any laptop with a web browser and stable, fast internet (10+ Mbps). All labs run in your browser on Code College's Docker infrastructure. No hardware upgrades needed.

Q Are the courses available online?

Yes. All modules are delivered live online via virtual classroom or in-person at Code College's Johannesburg campus in Woodmead, Sandton. Both options deliver the same instructor-led experience. Part-time schedules are available for groups.

Q How does the alumni discount work?

The 20% alumni discount rewards students who return after finishing a specialist track or the full Cybersecurity Bootcamp Certificate. If you complete a track or the full bootcamp and re-enrol within 36 months for additional modules outside that original enrolment, those modules are discounted 20% off their standalone price, applied automatically at re-enrolment. Modules purchased while you progress through your original track or bootcamp — even if bought one at a time rather than as a bundle — are priced at the standalone or bundle rate you enrolled under, not the alumni rate.

Q Can I try Module 1 first before committing to a track or the bootcamp?

Yes. Many students start with Module 1 — IT & Networking Foundations to see whether cybersecurity is the right fit before committing to a full track or bootcamp. If you enrol in a Specialist Track or the Full Bootcamp within 3 months of completing Module 1, your R9,500 Module 1 fee is credited in full toward the track or bootcamp price. Just tick the relevant box on the application form when you enrol, and our team will verify and confirm your adjusted total.

Q What if I don't pass my exam the first time?

If you sit Module 1's ISC² Certified in Cybersecurity (CC) or CompTIA Network+ exam and don't pass, you can redo Module 1's live classes at no extra charge, as many times as you need, until you pass or feel ready to move on. This is subject to there being a running Module 1 cohort with space for you to join — we don't guarantee a private repeat session on demand, but Module 1 runs frequently enough that a spot is usually available.
